

FINANCIAL CARD PERSONALIZATION SOLUTIONS

Financial Card Personalization Solutions

INSTANT CARD ISSUANCE

The S3000 line comprises two models that fully meet the market requirements for a reliable and affordable desktop instant card issuance solution. The S3000E and S3000GE featuring embossing and printing are the perfect answer for banks, credit unions and other financial entities with branch offices that need quality issuance of fully personalized, secure debit and credit cards, simple and cost-efficient.

The Matica FCP70i, financial card printer preset for flat card instant issuance provides a higher level of security with lockable card hoppers and ribbon compartments, and features a Kensington® lock to secure it to a countertop or table. It also includes an SD card slot for data security and built in management software to help keep the system running efficiently.

CUSTOMIZED DESKTOP CARD ISSUANCE

The S5000 line is comprised of task-specific solutions that re-package many of the key components of our top-selling S7000 as standalone machines for truly exceptional price-to-performance ratios. Whether it is embossing, graphics printing or laser engraving, there is now a dedicated Matica S5000 solution for the application.

THE SECURITY YOU NEED

Being a leading company on the market Matica considers innovation as a key element to keep its competitive edge. That is why our international team, formed by highly qualified engineers, located in the new R&D center in Italy, has been continuously exploring and developing cutting-edge solutions. With its new offering Matica is providing to the market a complete range of products for dedicated sectors.

Whatever your application requirements are, we ensure a perfect solution tailored to meet your specific situation. We offer a wide-ranging selection for the financial institutions starting from printers, instant and mid-range desktop solutions to the high performance modular systems able to combine card personalization functions with in-line mailing equipment to prepare your cards for delivery to the end user.

Fully compliant with all financial market standards, the Financial Card Issuance Line offers contact and contactless EMV Chip cards personalization. These solutions are capable of personalizing cards with the full range of card profiles, from embossing to indenting, encoding, tipping, color printing and laser engraving.

Especially for financial applications, data protection begins with software. Matica system personalization software allows customers to meet PCI Data Security Standards (PCI-DSS). System controller PCs are shipped pre-configured with this preloaded software package. In addition, customized or advanced levels of security, auditing and event logging can be configured easily.

MID-RANGE CARD ISSUANCE

Matica's S6000 line consists of several pre-configured card personalization system configurations for graphics printing, embossing or both. These smaller systems can be used on a table top or placed on an optional floor stand and will undoubtedly represent the optimal balance of price, performance and form factor for many customers.

HIGH VOLUME CARD ISSUANCE

Of the many innovative concepts implemented in S7000, two of most significant are the modularity and flexibility afforded by this advanced, scalable platform. The S7000 can be configured to perfectly match your current needs, while at the same time supporting any upgrades you may require in the future for increasing performance or adding functionalities.

ABOUT THE GROUP

Matica Technologies designs, manufactures and markets proprietary high performance, mid-range and desktop solutions for industrial card personalization and card mailing systems. The Group offers a full range of alternative personalization and encoding technologies for banking, government, access control, ID and transportation applications. The Matica companies provide local sales and service on a worldwide basis via its offices in Italy, Germany, France, Mexico, Singapore, China, the USA and the UAE.
